For manufacturers & exporters

FACTORY SHOOT DAY.

4 things to sort the day before the crew arrives.

01

CLEAR THE FLOOR.

Walkways and the area around the key machines free of clutter, cartons and scrap. Every clear metre is a usable shot.

02

TELL US WHAT IS RUNNING.

Which lines run, at what time. Machines in motion sell; machines switched off look like a photo.

03

ACCESS AND SAFETY.

Gate passes, PPE sizes and the zones we may not enter, agreed in advance so the first hour isn't lost.

04

ONE PERSON WHO KNOWS IT.

Someone who can explain the process in plain words, on camera or off. That voice makes the film.

SHOW THE FACTORY BEFORE THE VISIT.
